TITLE	Idaho Kids Count Data Book, 1994: Profiles of Child Well-Being.
INSTITUTION	Idaho KIDS COUNT Project, Boise.; Mountain States Group, Boise, ID.
SPONS AGENCY	Annie E. Casey Foundation, Baltimore, MD.
PUB DATE	Jan 95
NOTE	285p.
AVAILABLE FROM	Idaho KIDS COUNT Project, P.O. Box 83720, Boise, ID 82702-0100; phone: 800-739-KIDS ($15, including postage).
PUB TYPE	Statistical Data (110) -- Reports - General (140)
EDRS PRICE	MF01/PC12 Plus Postage.
DESCRIPTORS	*Adolescents; Birth Weight; Child Abuse; Child Health; Child Neglect; *Children; Demography; Dropout Rate; Early Parenthood; Family (Sociological Unit); High School Graduates; *Incidence; Infants; Mortality Rate; Poverty; Prenatal Care; *Social Indicators; State Surveys; Trend Analysis; Violence; *Well Being
IDENTIFIERS	*Idaho; *Indicators

ABSTRACT

This Kids Count data book examines county and statewide trends of Idaho children's well-being. The statistical profile is based on 14 indicators: (1) children under age 18 in poverty; (2) children in single parent families; (3) births with adequate prenatal care; (4) infant mortality rate; (5) births to mothers age 10 to 19 without prenatal care; (6) low birth weight infants; (7) death rate of children age 1 to 14; (8) high school graduation rate; (9) teens age 16 to 19 not enrolled in school who are high school dropouts; (10) births to unmarried teens age 10 to 19; (11) juvenile violent crime arrest rate; (12) teens age 16 to 19 not in school and not working; (13) teen violent death rate (age 15 to 19); and (14) child abuse rates. Several findings emerge from the analysis. About 16 percent of Idaho children live in poverty, and about 15 percent live in single parent families. About 70 percent of infants are born with adequate prenatal care, with an infant mortality rate of 8.2 per 1,000 births, and a child death rate of about 35 per 100,000 children. About 90 percent of Idaho twelfth graders graduate from high school. About 7 percent of live births occur to unmarried teens age 10 to 19; the juvenile violent crime arrest rate is currently 309 per 100,000 youths; and the teen violent death rate is about 72 per 100,000. Two appendices present a summary table, data sources, and indicator definitions. (KDFB)

PROFILES OF CHILD WELL-BEING

PS 025105

Published with assistance from
The Family and Workplace Consortium

BEST COPY AVAILABLE

KIDS COUNT, a project of the Annie E. Casey Foundation, is a national and state-by-state effort to track the status of children in the United States. By providing policy makers and citizens with benchmarks of child well-being, KIDS COUNT seeks to enrich local, state, and national discussions concerning ways to secure better futures for all children. Annie E. Casey Foundation, 111 Market Place Fourth Floor, Baltimore, MD 21202 (410-234-2872; FAX 410-234-2891).

In 1994, the Idaho Office for Children and Boise State University, Public Affairs Program received a four-year grant from the Annie E. Casey Foundation to begin an Idaho KIDS COUNT project. The overall goal of this project is to improve the quality of life and opportunity for Idaho's youngest citizens.

Idaho KIDS COUNT Project activities are guided by the Idaho KIDS COUNT Advisory Council. The Council consists of representatives from the private sector business, child advocacy groups, state agencies, the State Legislature, and local units of government.

The Idaho KIDS COUNT Databook contains county level information on the conditions of Idaho children. This book provides information to help better understand some of the complicated issues related to children and families.

This book was published with the financial assistance of the Family And Workplace Consortium. The Consortium consists of community and business leaders who endorse and promote family friendly practices within Idaho. The Consortium's focus is to develop awareness and educational programs for businesses in Idaho which "fosters a management environment sensitive to the balance of family and work obligations." Family And Workplace Consortium, PO Box 1353, Boise, Idaho 83701.

Acknowledgments . . . . . Inside back cover

"Providing a good education for our children is the number one fiscal obligation of the state. At times, that may mean providing extra support for children who come from a disadvantaged background; but the state is not well-equipped to act as a surrogate parent. I believe in all things we do we must ask ourselves whether the program serves to build up the basic unit of our society — the family."

— Governor Phil Batt

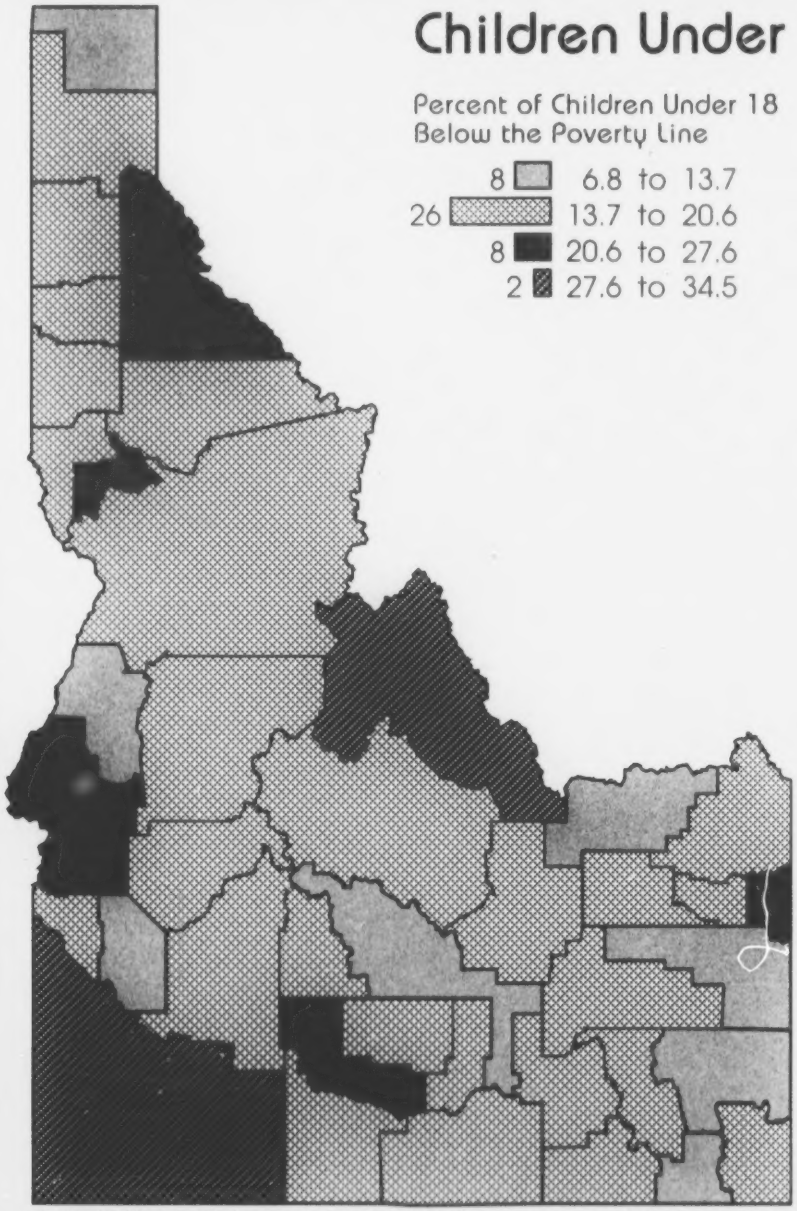
Children Under 18 in Poverty



Children in Poverty is a measure of the percent of children under the age of 18 living below the U.S. Poverty Threshold. The 1990 Census data for poverty are based on 1989 personal income and the 1989 poverty threshold.

The Poverty Threshold is defined as three times the amount of money it takes to feed a family for one year. In 1989, the national poverty threshold for a family of four was $12,674.

In 1989, a total of 49,159 (16.2%) of Idaho's children were living in poverty. Caribou County had the smallest percent (6.8%); Owyhee County had the largest percent (34.5%).

Poverty is closely related to a broad range of negative outcomes for children. Early in life it is associated with less prenatal care, low birth weight, higher infant mortality, and slower cognitive development.

During adolescence and young adulthood poverty is associated with lower levels of school readiness and lower levels of educational attainment.

Caution should be exercised when attempting to draw conclusions from percents and rates depicted in this publication that are based on small numbers. See Data Sources and Notes on Page 131
Formulas provided in the text are in a generalized format; detailed formulas are provided in the Data Sources and Notes on Page 132.

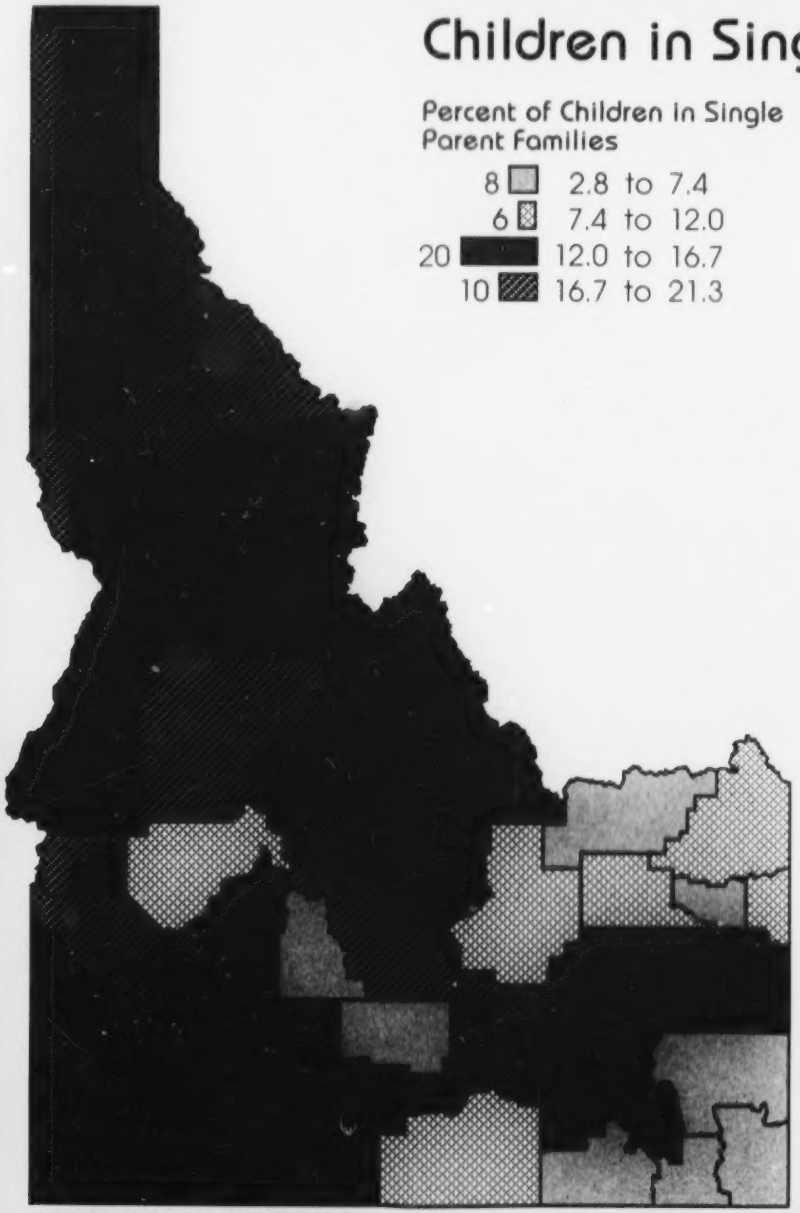
CHILDREN UNDER 18 IN POVERTY

IDAHO kids count

IDAHO kids count

Children in Single Parent Families



Children in Single Parent Families is the percentage of related children under age 18 who live in families headed by a person — male or female — without a spouse present in the home. "Related children" includes the family head's children by birth, marriage, or adoption, as well as other persons under age 18 who are related to the family head.

In 1990, there were 42,840 (14.7%) of Idaho's children living in single parent families. Oneida County had the smallest percent (2.8%). Shoshone County had the largest percent (21.3%).

Nationally, in 1992, the poverty rate for single-parent families was 42%; for two-parent families, it was 8%.

Children in Single-Parent Families generally do not have access to similar economic, human, or housing resources as those in two-parent families.

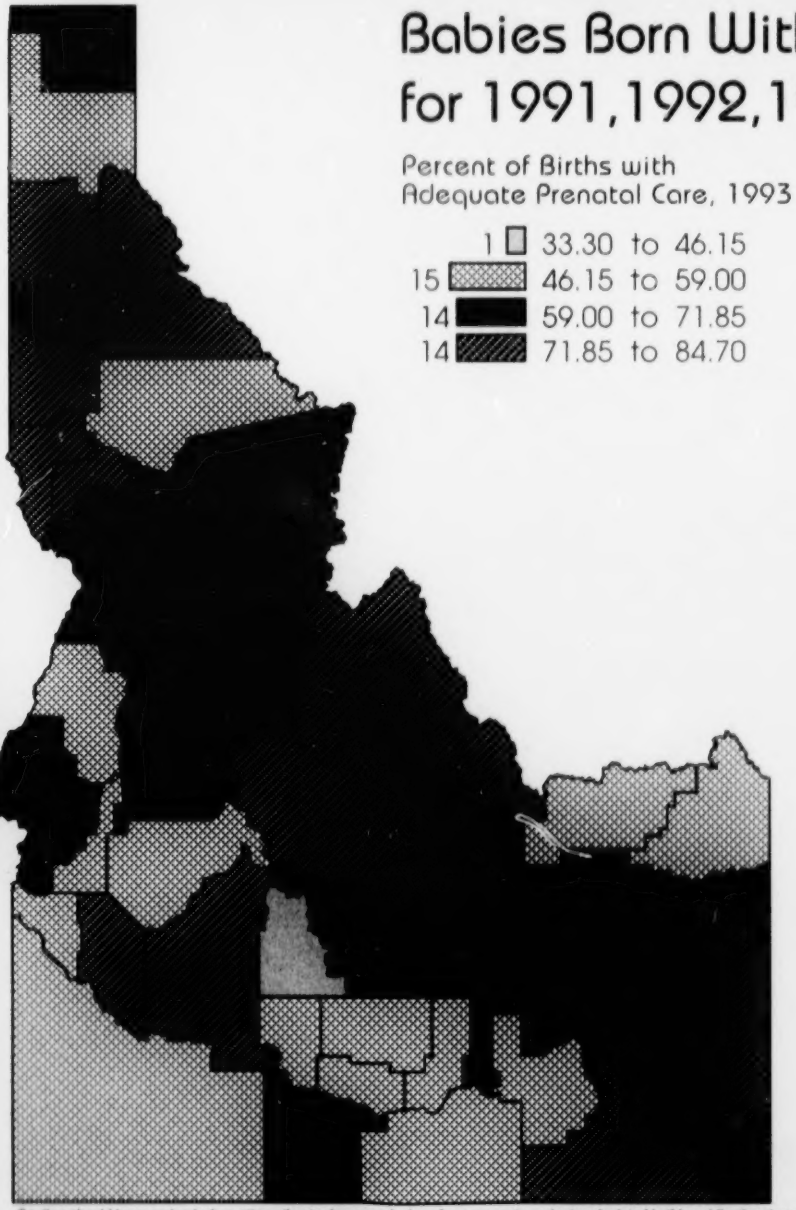
CHILDREN IN SINGLE PARENT FAMILIES

IDAHO kids count

Babies Born With Adequate Prenatal Care for 1991,1992,1993



Percent of Births with Adequate Prenatal Care, 1993

1	33.30 to 46.15	
15	46.15 to 59.00	
14	59.00 to 71.85	
14	71.85 to 84.70	

The percent of Babies Born with Adequate Prenatal Care is based on the Kessner Index of Prenatal Care which classifies prenatal care as Adequate, Intermediate, or Inadequate in accordance with recommendations for prenatal care set forth by the American College of Obstetricians and Gynecologists and the World Health Organization.

The formula is births with adequate prenatal care, divided by total live births, and multiplied by 100.

In 1993, there were 11,673 (70.9%) Idaho births classified as receiving adequate prenatal care. Bonneville County had the highest percent (84.7%).

Adequate prenatal care increases the chances of delivering healthy, full-term, normal weight babies. Early and ongoing prenatal care can reduce the costs for neonatal intensive services to low birth-weight babies.

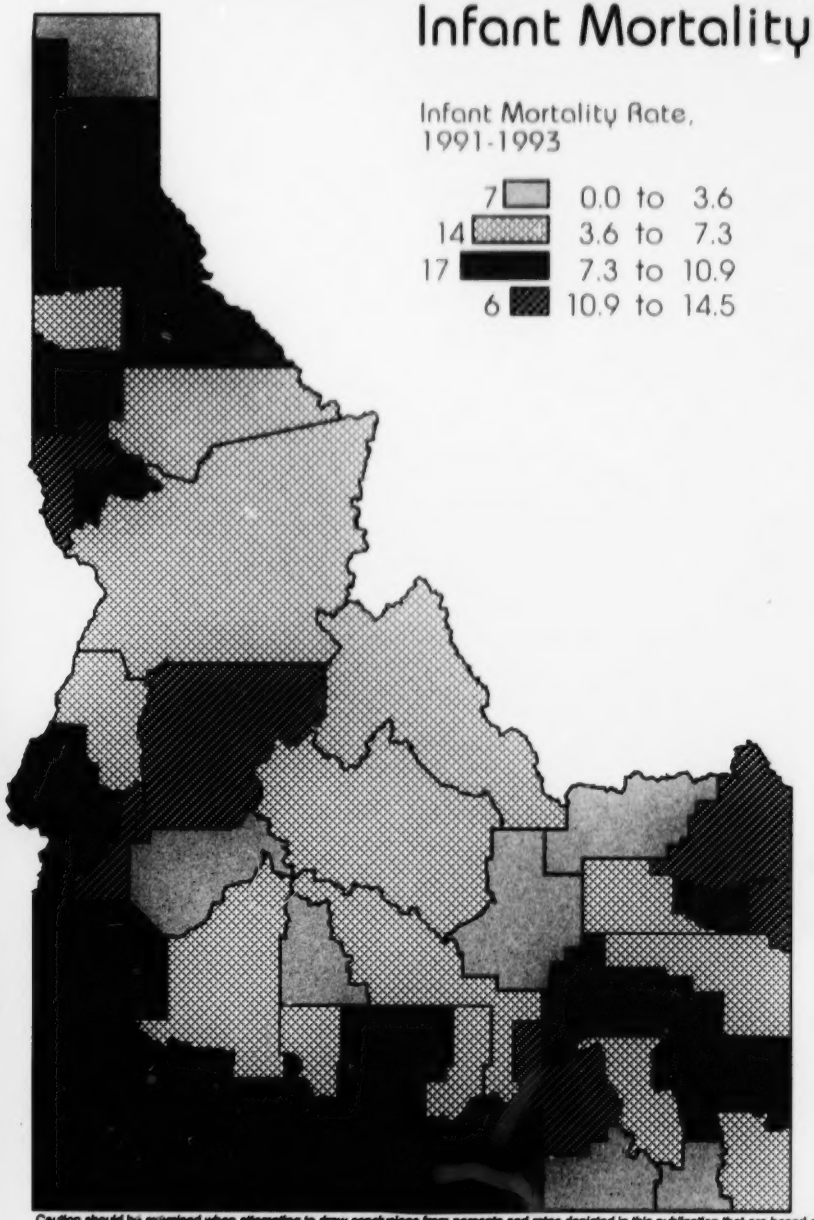
Infant Mortality Rate



Infant Mortality Rate (per 1,000 live births) is the number of deaths occurring to infants under one year of age per 1,000 live births. Data are reported by place of residence, not by place of death.

The formula for the Infant Mortality Rate is: The number of infant deaths, divided by the total number of live births, and multiplied by 1,000.

Nationally, the Infant Mortality Rate has fallen from 10.6 per 1,000 births in 1985 to an all-time low of 8.9 per 1,000 births in 1991.

Idaho has shown a similar trend. The three year infant mortality rate has steadily fallen from 10.6 per 1,000 births in the mid-1980s (1985-1987) to a current rate of 8.2 per 1,000 births (1991-1993).

Boise, Boundary, Butte, Camas, Clark, and Oneida counties had no infant deaths from 1991 to 1993.

The decline in the infant mortality rate is usually attributed to public education efforts and advances in neonatal medical care.

NOTE: Due to year-to-year rate fluctuation, map shows a three-year rate.

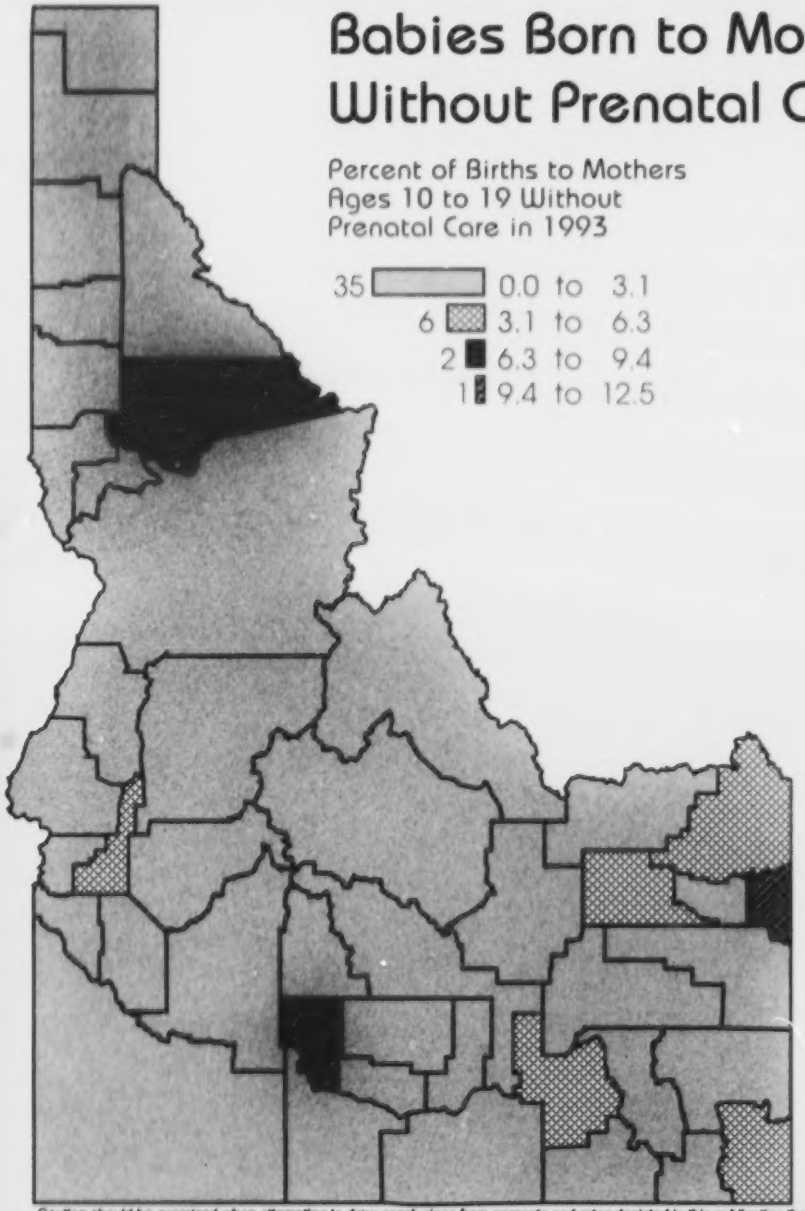
Babies Born to Mothers Ages 10 to 19 Without Prenatal Care



Babies Born to Mothers Without Prenatal Care Ages 10 to 19 refers to births to mothers in this age group who reported that they did not receive prenatal care during their pregnancy.

The formula for this percent is births to mothers ages 10 to 19 without prenatal care, divided by total live births to mothers ages 10 to 19, and multiplied by 100.

In 1993, there were 29 (1.2%) births to Idaho mothers ages 10 to 19 that reported receiving no prenatal care. Since 1991, this percent has been on a steady decline.

The lack of prenatal care is believed to add to the number of pregnant women who engage in behaviors (smoking, unhealthy diet, drug abuse) that add risk to the health of their babies.

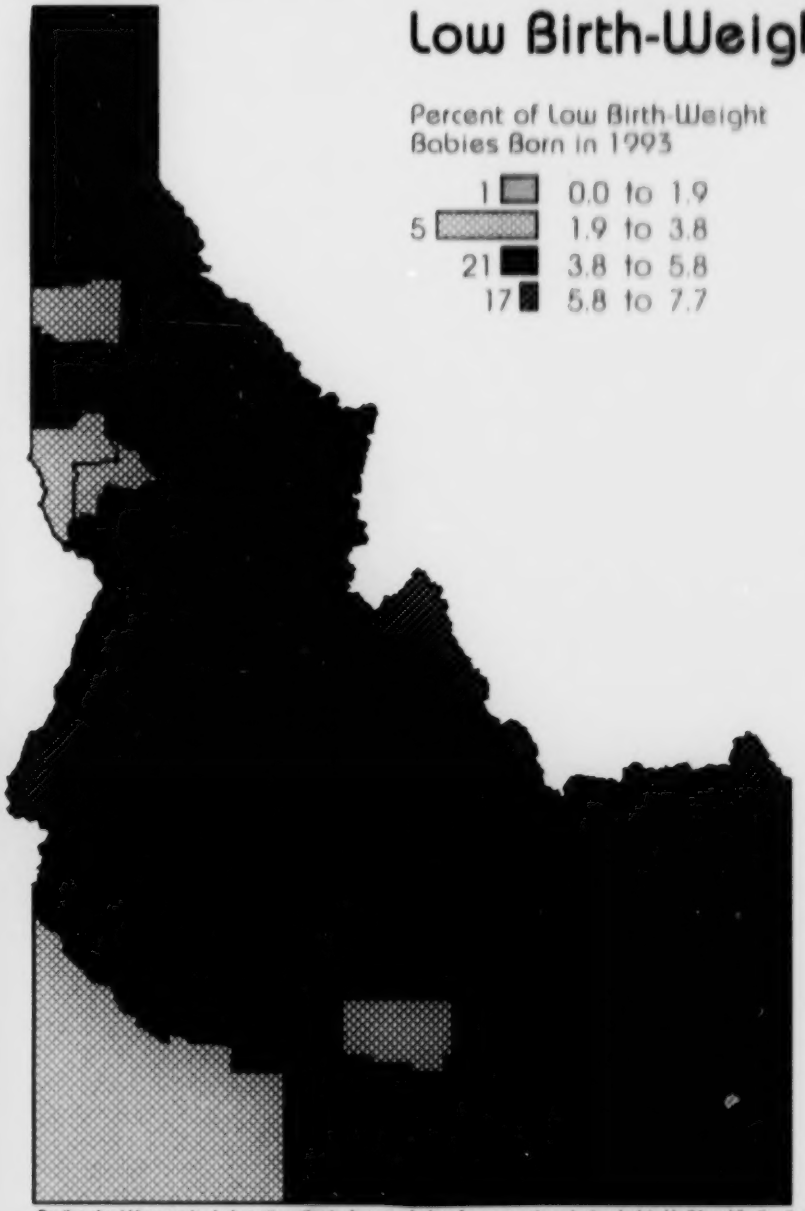
Low Birth-Weight Babies



Low Birth-Weight Babies includes live births weighing 2,500 grams (5.5 pounds) and under. The data are reported by place of mother's residence not by place of birth.

The formula for percent of Low Birth-Weight Babies is babies 5.5 pounds and below, divided by the total live births, and multiplied by 100.

In 1993, there were 923 (5.3%) low birth-weight babies born in Idaho. Since 1991, the number and percent of Low Birth-Weight Babies has been on a steady decline.

Low Birth-Weight Babies are more likely than normal weight babies to experience developmental problems during the early stages of growth.

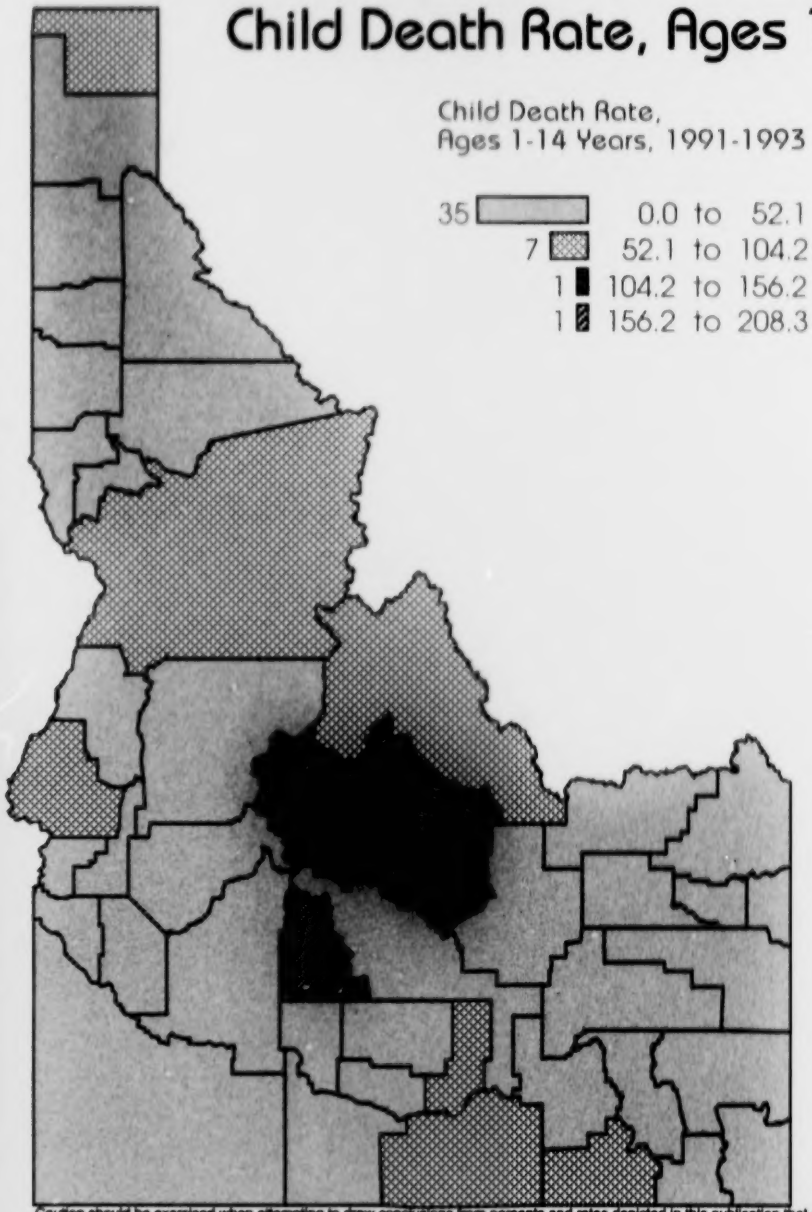
Child Death Rate, Ages 1 to 14 Years, 1991 to 1993



Annualized Child Death Rate ages 1 to 14 years refers to the average number of deaths from all causes per 100,000 children during an aggregate of 1991 to 1993. Data are reported by place of residence not by place of death.

The formula for this rate is the number of deaths to children ages 1 to 14 years (1991-1993) divided by 3, divided again by the population of children ages 1 to 14 years in 1992, and multiplied by 100,000.

In Idaho, for this period, there were 263 child deaths ages 1 to 14. The 1991-1993 Annualized Child Death Rate was 34.7 per 100,000 children.

In 1991, the national Child Death Rate ages 1 to 14 was 30.7 per 100,000 children.

This indicator is a measure of the risk to children's health and the adequacy of accident prevention activities and treatment resources.

CHILD DEATH RATE, AGES 1 TO 14 YEARS

IDAHO kids count

High School Graduates

High School Graduates by School District is the percentage of students who graduated from high school by August, 1994.

The formula for high school graduates is the number of students who graduated from high school by August, 1994, divided by the 12th grade students enrollment as of October 1, 1993, and multiplied by 100. This formula does not adjust for migration or dropouts.

In 1994, 13,281 (88%) 12th grade students graduated from high school in Idaho.

Graduating from high school is associated with long term positive outcomes for young adults. Those who graduate are more likely to be regularly employed than non-graduates.

Standardized Test Scores by Grade and School District

Standardized Test Scores by Grade Level and School District include both Pupil Norms (PN) and School Norms (SN). The table lists the 1993-1994 School Year Standardized Test Scores for 6th and 8th Grade Iowa Tests of Basic Skills (ITBS) and the 11th Grade Tests of Achievement and Proficiency (TAP).

Pupil Norms reflect the performance of hundreds of thousands of students who were part of the national standardization. Pupil Norms allow for comparisons of individual student scores to the scores of other students in the same grade nationally. Idaho 6th grade students performed as well or better than 53% of other 6th grade students nationally.

For the 1993-94 school year in Idaho, the average score for 6th grade Pupil Norm was 53; the 8th grade Pupil Norm was 52. The 11th grade average Pupil Norm score was 58.

School Norms reflect the average performance of school buildings that were part of the national standardization. School Norms allow for the comparison of the performance between buildings. Idaho 11th grade schools performed as well or better than 65% of other 11th grade schools nationally.

For the 1993-94 school year in Idaho, the average score for 6th grade School Norm was 50; the 8th grade School Norm was 49. The average 11th grade School Norm score was 65.

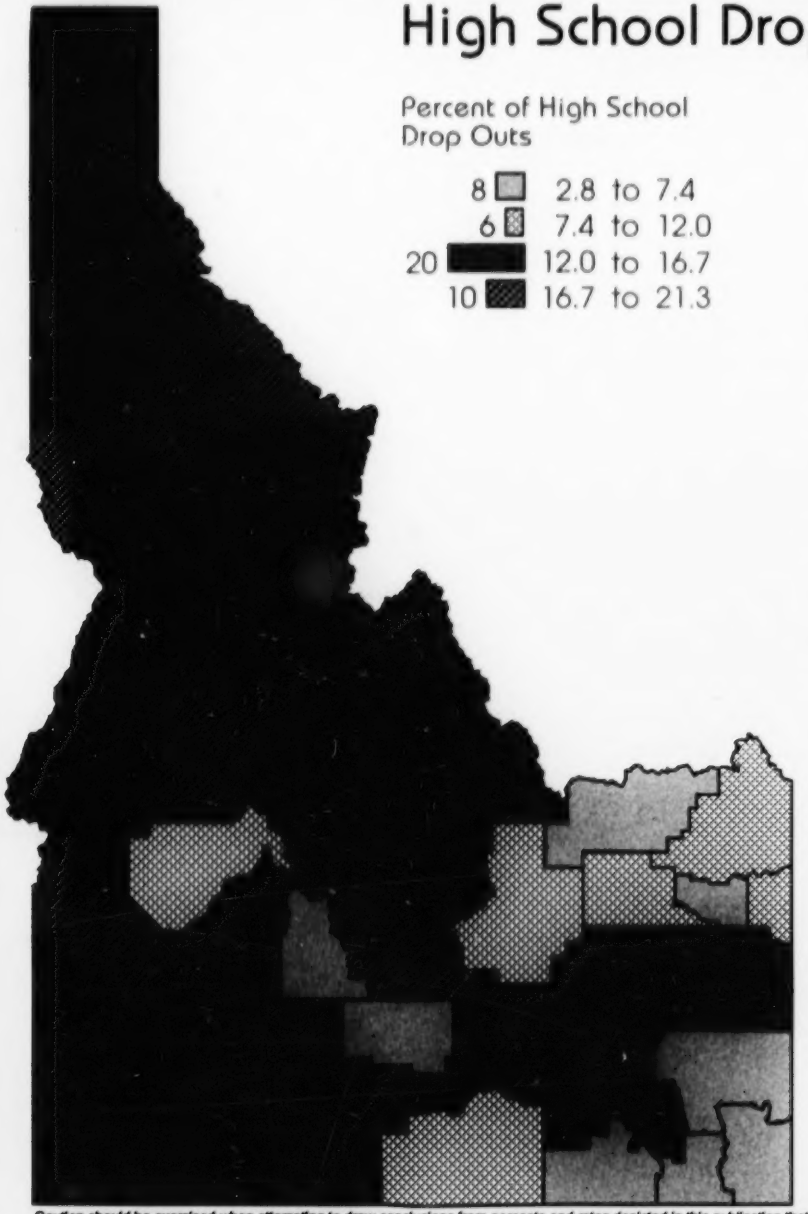
ACADEMIC ACHIEVEMENT

IDAHO kids count

High School Dropouts



High School Dropouts indicator is the percentage of teens ages 16 to 19 who are not enrolled in school (full or part-time) and who are not a high school graduate.

In 1990, 6,627 (10.4%) of Idaho's 16 to 19 year olds dropped out of high school. Camas County and Clark County had the smallest percent (0.0%); Jerome County had the largest percent (24.8%).

In 1992, the unemployment rate for those who dropped out of high school was 11.4%. The rate for high school graduates with no college was 6.8%. Among the full-time employed, the median income of high school graduates was twice that of high school drop outs.

Dropping out of high school is associated with long term, negative outcomes for children. In early adulthood those who drop out are less likely to be regularly employed. Also the jobs typically available to those who drop out of high school are associated with instability, low pay, and limited upward mobility.

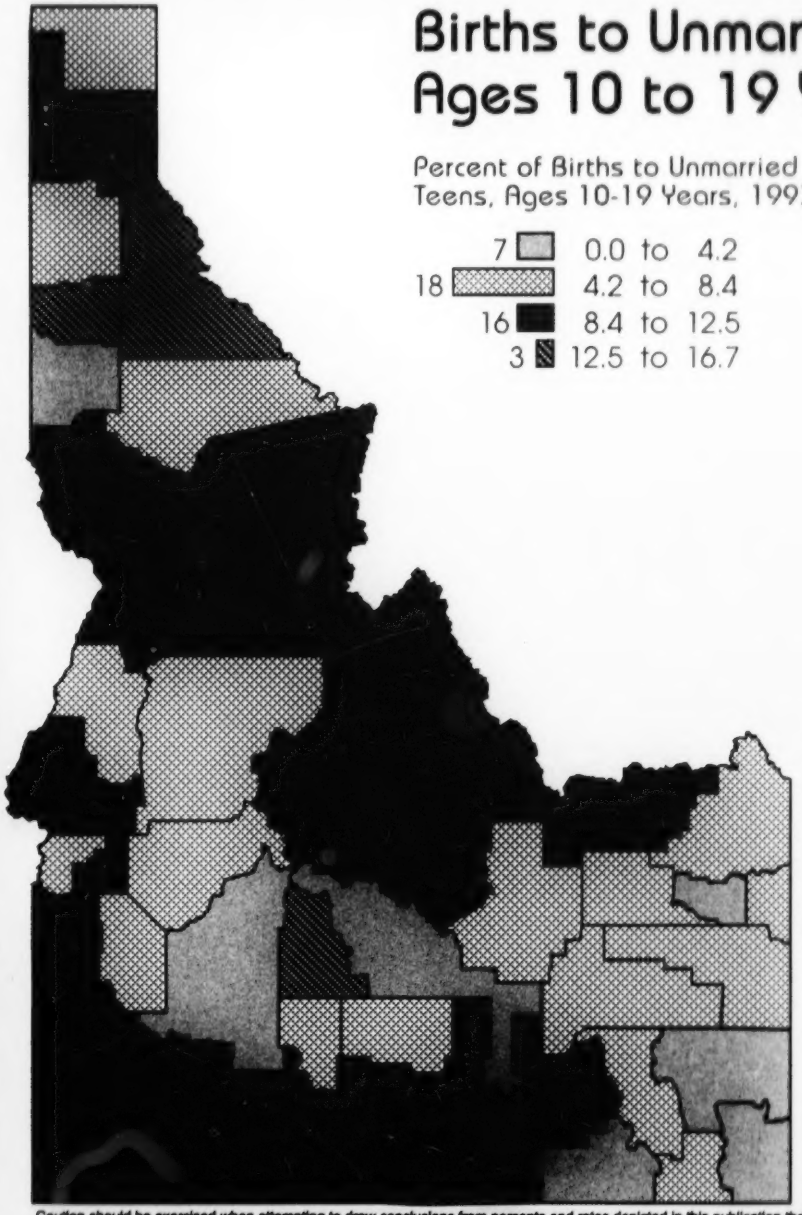
HIGH SCHOOL DROPOUTS

IDAHO kids count

Births to Unmarried Teens, Ages 10 to 19 Years



Percent of Births to Unmarried Teens, Ages 10-19 Years, 1993

7	0.0 to 4.2	
18	4.2 to 8.4	
16	8.4 to 12.5	
3	12.5 to 16.7	

Births to Unmarried Teens Ages 10 to 19 years is the percentage of live births which occur to unmarried women under age 20. Data are reported by the mother's place of residence.

The formula for the percent of Births to Unmarried Teens is the number of births to unmarried teens, divided by the number of all live births, and multiplied by 100.

In Idaho since 1991, the number and percent of births to unmarried teens has steadily increased. In 1991, there were 1,127 births (6.7%); in 1993 there were 1,264 births (7.3%).

These teen mothers are likely to have low incomes and to have to work especially hard to provide the necessary resources for their child's development.

IDAHO kids count

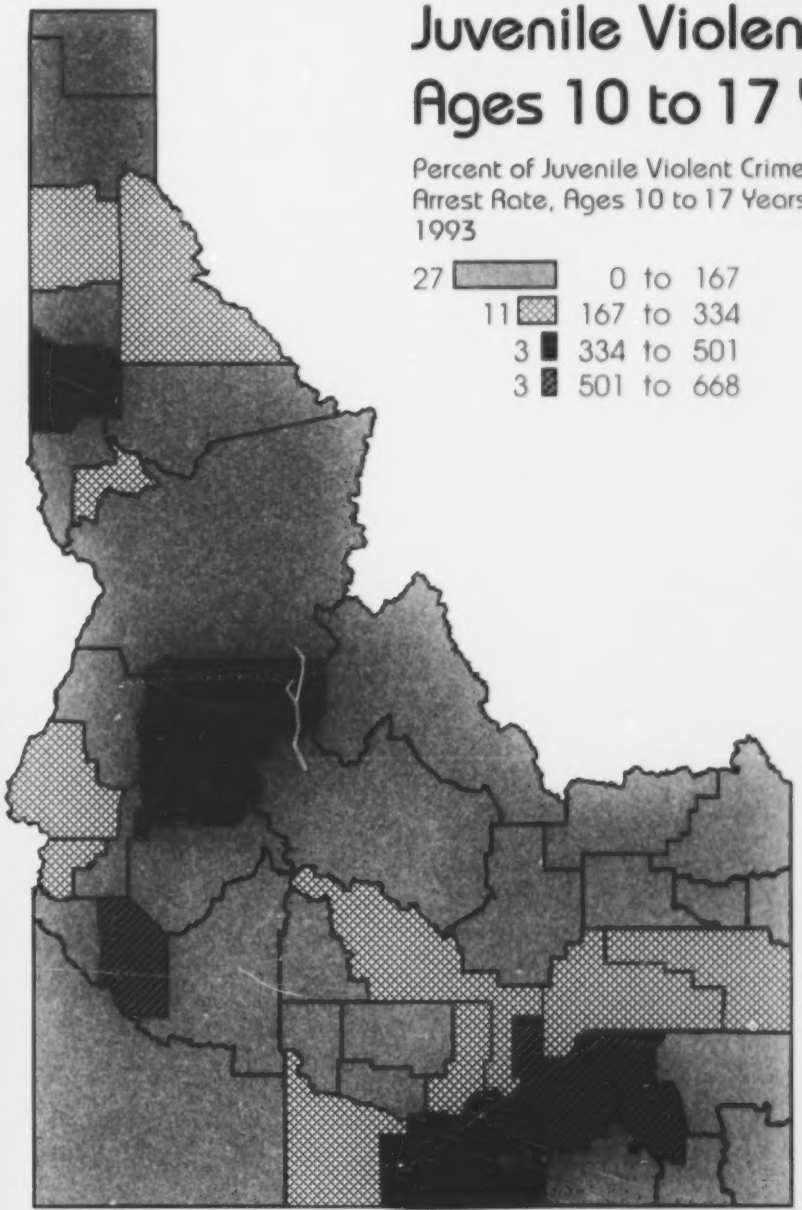
Juvenile Violent Crime Arrest Rate, Ages 10 to 17 Years



Percent of Juvenile Violent Crime Arrest Rate, Ages 10 to 17 Years, 1993

27	0 to 167	
11	167 to 334	
3	334 to 501	
3	501 to 668	

Juvenile Violent Crime Arrest Rate Ages 10 to 17 years refers to the number of arrests of youths in this age group for violent crime (homicide, forcible rape, robbery, or aggravated assault). This includes repeat arrests of these same youth within the given year.

The formula for this rate is the number of arrests for violent crimes by youths ages of 10 to 17 in 1993, divided by the population of youths ages 10 to 17 in 1992, and multiplied by 100,000.

In 1991, the national Juvenile Violent Crime Arrest Rate was 457 per 100,000 youths ages 10 to 17.

In Idaho the 1993 Juvenile Violent Crime Arrest Rate was 309 per 100,000 youths ages 10 to 17.

Violent Crime Arrests are a measure of self-destructive and anti-social behavior. It indicates more severe anti-social behavior than arrests for other types of crime.

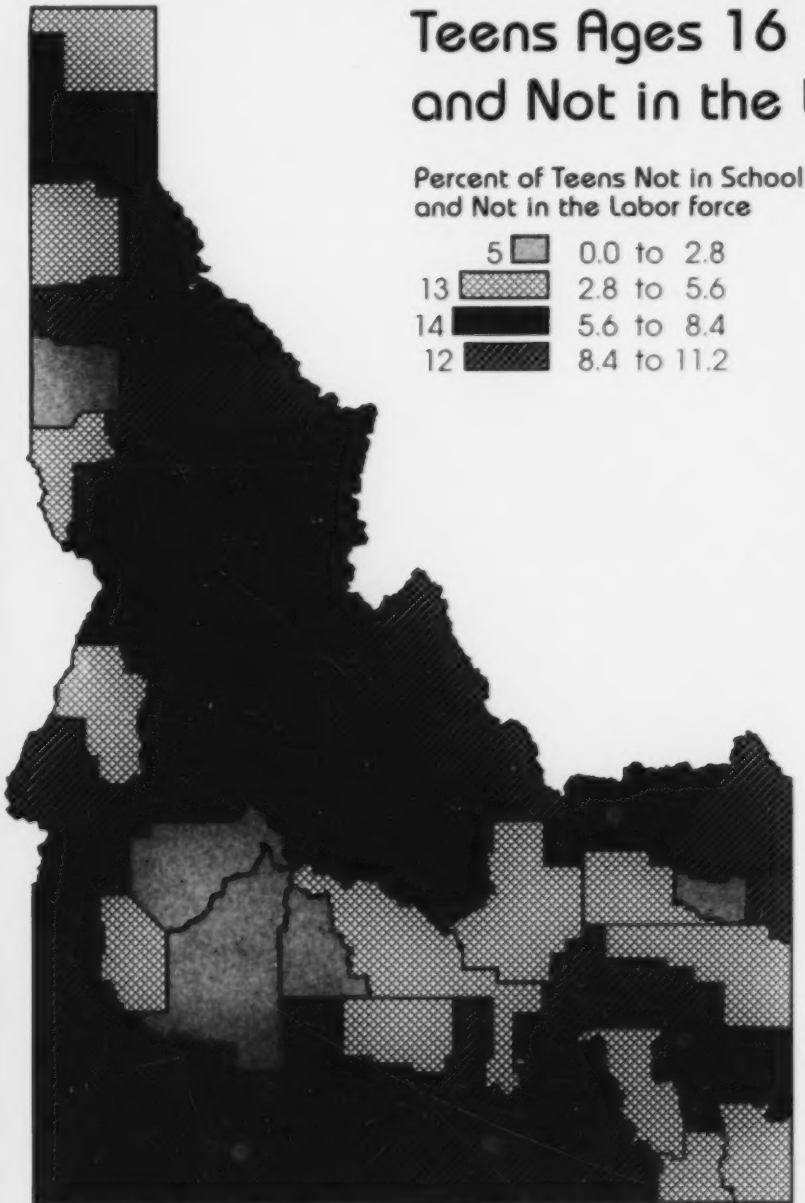
Teens Ages 16 to 19 Not in School and Not in the Labor Force



Teens Not in School and Not in the Labor Force Ages 16 to 19 years refers to the percentage of teens ages 16 to 19 who are not enrolled in school (full or part-time), not in the labor force, and not in the Armed Forces.

The formula for this indicator is the number of teens ages 16 to 19 who are not enrolled in school (full or part-time), not in the labor force, and not in the Armed Forces, divided by the total number of teens ages 16 to 19, and multiplied by 100.

In 1990, there were 3,366 (5.3%) Idaho teens ages 16 to 19 who were not enrolled in school, not in the labor force, and not in the Armed Forces.

This group of teens are at high risk of delinquency and crime. For those who have dropped out of school, lack of work experience at this point in their lives will have a negative impact on future employment.

Late adolescence is an important transition point into adulthood. Youth not engaged in the social roles (student, worker) necessary to a successful transition to adulthood will generally have diminished success as adults.

Caution should be exercised when attempting to draw conclusions from percents and rates depicted in this publication that are based on small numbers. See Data Sources and Notes on Page 131.
Formulas provided in the text are in a generalized format; detailed formulas are provided in the Data Sources and Notes on Page 134.

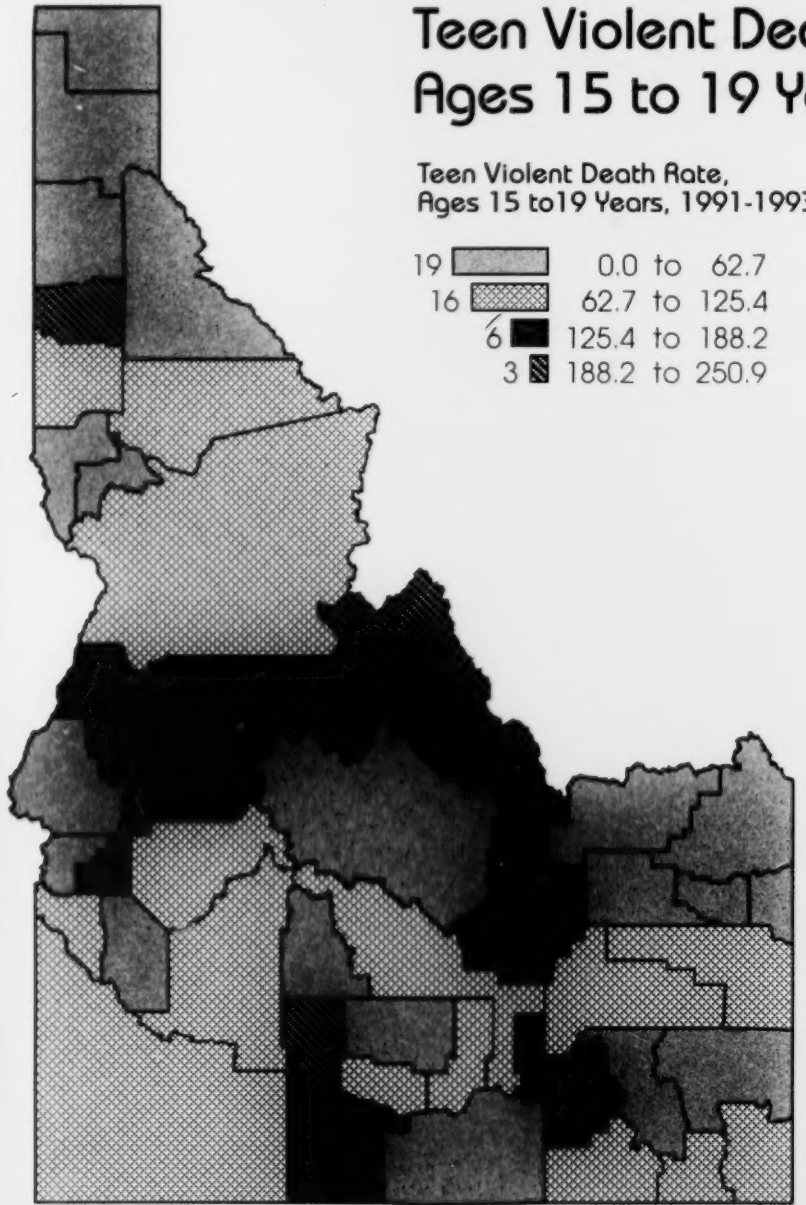
Teen Violent Death Rate, Ages 15 to 19 Years



Annualized Teen Violent Death Rate Ages 15 to 19 years (per 100,000 teens) is the number of deaths from homicide, suicide, and accidents to teens between ages 15 to 19, per 100,000 teens in this age group. The data are reported by place of residence, not by place where the death occurred, and in the aggregate of 1991 to 1993.

The formula for this rate is the number of violent deaths to teens between ages 15 to 19 (1991-1993) divided by 3 and divided again by the total population of teens between ages 15 to 19 in 1992 and then multiplied by 100,000.

In 1991, the National Teen Violent Death Rate was 71.1 per 100,000.

In Idaho, the 1993 Teen Violent Death Rate was 71.6 per 100,000.

TEEN VIOLENT DEATH RATE, AGES 15 TO 19 YEARS

IDAHO kids count

Child Abuse

Total Number of Child Abuse Reports refers to the total number of child abuse reports filed with the Idaho Department of Health and Welfare (IDHW) from July 1, 1993 to June 30, 1994 (FY1994).

County Not Identified lists the number of reports where the county name was not recorded. This accounts for 140 (1%) of the child abuse reports during FY1994.

Total Number of Families Subject of Child Abuse Reports is the total number of families that were the subject of child abuse reports filed with the IDHW during FY1994.

Child Abuse by Number of Reports and Type of Abuse Reports is the number of reports categorized by type of abuse (Sexual, Physical, Neglect, or Other) as reported to IDHW during FY1994.

The overall profile for reported types of abuse during FY1994 is Sexual 21.7%, Physical 31.1%, Neglect 38.7%, and Other 8.6%.

Child Abuse by Disposition of Reports is the number of child abuse reports by disposition type: Valid, Indicated, Unable to Determine, Invalid, or Other, as determined by the IDHW during FY1994.

Valid refers to clear indication of abuse.

Indicated refers to having reasonable cause to believe abuse has occurred.

Unable to Determine refers to no firm belief that abuse has occurred, or unable to locate the family.

Invalid refers to clearly unfounded reports.

Other refers to dispositions that did not fit into the defined categories.

The overall profile of report disposition during FY1994 is Valid 14.6%, Indicated 10.1%, Unable to Determine 35.9%, Invalid 22%, and Other 17.4%.

"We must put our resources to work to produce healthy, safe, and educated children. We must either speak decisively to society's shortcomings for our children or continue to reap the bitter harvest of illiteracy, poverty, and crime when today's neglected child becomes tomorrow's disillusioned adult. Remember, the most important resource we have is our children."

— Cecil D. Andrus, Governor (1972-1977; 1986-1994)

APPENDIX 2 – DATA SOURCES & NOTES

INDICATORS OF CHILD WELL-BEING

The indicators of child well-being are grouped into five categories: Material/Economic Well-Being, Cognitive Development/Academic Achievement, Health, Adolescent ...havior, and Emotional Well-Being and Physical Safety. The book's fifteen indicators are used to measure the conditions that affect the lives of Idaho's children. These indicators possess three important attributes:

1. They reflect a broad range of conditions influencing the well-being of children;

2. They reflect conditions that span the range of developmental stages — from birth through adolescence;

3. They are outcome measures which can be updated annually or every other year allowing for legitimate comparisons and trend analysis.

BACKGROUND INFORMATION

Background information falls into three categories: Population, Work and Family, and Family Profiles. This information focuses on the community context in which children live.

NUMBERS, PERCENTS, AND RATES

Each statistic tells us something different about children. The numbers represent real individuals. The percents and rates also represent individuals but have the advantage of allowing for comparisons between counties.

In this publication, indicators are expressed as either raw numbers (25), percents (25%), or rates (25 per 1,000 or 25 per 100,000). The formula for percents and rates is the number of cases (kids), divided by the base population (county, state), and multiplied by 100 for percents or 1,000 or 100,000 for rates.

Communities with small populations can show very large or very small percentages as a result of only a few individual's behavior. As an example, this can be seen in the percent of 12th grade graduations. In 1994, Garden Valley school district with nine graduating students had the lowest percent (64%) of graduation in the state. Council school district with 26 graduating students had the highest percent (118%). These districts, as a result of a few individuals dropping out or changing schools, received very low or very high percent scores.

Continued

INDICATORS

MATERIAL/ECONOMIC WELL-BEING

Children in Poverty is the percentage of related children under age 18 who live in families with incomes below the U.S. Poverty Threshold as defined by the U.S. Office of Management and Budget. "Related children" include the family head's children by birth, marriage, or adoption as well as other persons under age 18 who are related to the family head. The poverty threshold in 1989 for a family of four was $12,674. The 1990 Census data for poverty are based on the 1989 personal income and 1989 poverty threshold. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Children in Single Parent Families is the percentage of related children under age 18 who live in families headed by a person — male or female — without a spouse present in the home. "Related children" include the family head's children by birth, marriage, or adoption, as well as other persons under age 18 who are related to the family head. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

COGNITIVE DEVELOPMENT/ACADEMIC ACHIEVEMENT

High School Graduates by School District is the percentage of those students who graduated from high school by August, 1994, divided by those enrolled in 12th grade as of October 1, 1993 (12th Grade Net Enrollment), then multiplied by 100. This formula does not adjust for migration or dropouts. **Data Source:** Public and Non-Public School Membership: Public School 12th Grade Net Enrollment; and 1993-1994 School Year High School Graduate Report. School year data. Idaho Department of Education, P.O. Box 83720, Boise, Idaho 83720-0027 (208-334-3330).

Standardized Test Scores by Grade Level, School District includes both Pupil Norms and School Norms. Pupil Norms reflect the performance of hundreds of thousands of students who are part of the national standardization. The Pupil Norms evidence frequency distributions that are very broad and diverse. Pupil Norms allow for comparisons of individual student scores to the scores of other students in the same grade nationally. School Norms reflect a naturally smaller number of school buildings that participate in the national standardization. School Norms allow for the comparison of performance between buildings. **Data Source:** 1993-1994 School Year Standardized Test Scores for 6th Grade Iowa Tests of Basic Skills (ITBS), Pupil Norms and School Norms; 8th Grade Iowa Tests of Basic Skills (ITBS), Pupil Norms and School Norms; 11th Grade Tests of Achievement and Proficiency (TAP), Pupil Norms and School Norms. School year data. Idaho Department of Education, P.O. Box 83720, Boise, Idaho 83720-0027 (208-334-3330).

High School Dropouts is the percentage of teens ages 16 to 19 who are not enrolled in school (full or part-time) and not a high school graduate. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

HEALTH

Babies Born with Adequate Prenatal Care is based on the Kessner Index of Prenatal Care which classifies prenatal care as Adequate, Intermediate, or Inadequate in accor-

dance with recommendations for prenatal care set forth by the American College of Obstetricians and Gynecologists and the World Health Organization. The Kessner Index considers the onset of prenatal care and varies the number of required prenatal visits with length of gestation. The only difference between Idaho data and the standard Kessner Index is the exclusion of Idaho records with missing information rather than assignment to the Inadequate category. Records with missing information are subtracted from Resident Live Births (which includes only single births and firstborn infants of multiple births) resulting in Remaining Live Births. The percentage is derived from the category of births with Adequate Prenatal Care which is divided by Remaining Live Births and multiplied by 100. **Data Source:** 1991 Idaho Annual Summary of Vital Statistics; 1992 Idaho Annual Summary of Vital Statistics; and special data runs for 1993 data. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

Infant Mortality Rate (per 1,000 live births) is the number of deaths occurring to infants under one year of age per 1,000 live births. The data are reported by place of residence, not by place of death. **Data Source:** 1991 Idaho Annual Summary of Vital Statistics; 1992 Idaho Annual Summary of Vital Statistics; and special data runs for 1993 data. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

Babies Born to Mothers Without Prenatal Care Ages 10-19 is the percentage of births to mothers ages 10-19 who reported that they did not receive prenatal care during their pregnancy. Mothers are asked what month of pregnancy prenatal care began and the total number of prenatal visits. This information is recorded on the birth certificate at the time of the baby's birth. The numbers of births to mothers without prenatal care is divided by total live births to mothers ages 10-19, and multiplied by 100. **Data Source:** Special data runs for 1991, 1992, and 1993 data. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

Low Birth-Weight Babies is the percentage of live births weighing under 2,500 grams (5.5 pounds). The data are reported by place of mother's residence, not by place of birth. **Data Source:** 1991 Idaho Annual Summary of Vital Statistics; 1992 Idaho Annual Summary of Vital Statistics; and special data runs for 1993 data. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036, (208-334-5978).

Child Death Rate Ages 1-14 years (per 100,000 children) is the number of deaths from all causes to children between ages 1 to 14, per 100,000 children in this age range. The data are reported by place of residence, not by place of death. Annualized rate for 1991-1993. **Data Source:** Special data runs: 1991-1993 data and 1992 population estimates for ages 1 to 14. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

ADOLESCENT BEHAVIOR

Births to Unmarried Teens Ages 10-19 years is the percentage of live births which occur to unmarried women under age 20. Data are reported by the mother's place of residence. **Data Source:** 1991 Idaho Annual Summary of Vital Statistics. 1991 total live births are revised figures; 1992 Idaho Annual Summary of Vital Statistics; and special data runs for 1993 data. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

Juvenile Violent Crime Arrest Rate Ages 10-17 years (per 100,000 youths) is the number of arrests of persons under age 18 for violent offenses (homicide, forcible rape, robbery, or aggravated assault), per 100,000 youths between the ages of 10 to 17. Rates are not shown in the table for those counties with youth populations under 150 that have incidences of juvenile violent crime arrests. Caution must be exercised when drawing conclusions from rates for counties with small populations. **Data Sources:** 1993 data. Idaho Department of Law Enforcement, Support Services, P.O. Box 700, Meridian, Idaho 83680 (208-884-7040). 1992 population estimates for ages 10 to 17. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, 83270-5450 (208-334-5978).

Teens Not in School and Not in the Labor Force Ages 16-19 years is the percentage of teens ages 16 to 19 who are not enrolled in school (full or part-time), not in the labor force and not in the Armed Forces. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Teen Violent Death Rate Ages 15-19 years (per 100,000 teens) is the number of deaths from homicide, suicide, and accidents to teens between ages 15 and 19, per 100,000 teens in this age group. The data are reported by place of residence, not by place where the death occurred. The Annualized rate is 1991-1993. **Data Source:** Special data runs: 1991-1993; 1992 population estimates for ages 15 to 19. Calendar year data. Idaho Department of Health and Welfare, Center for Vital Statistics and Health Policy, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5978).

EMOTIONAL WELL-BEING AND PHYSICAL SAFETY

Total Number of Child Abuse Reports is the number of child abuse reports filed with the Idaho Department of Health and Welfare during fiscal year 1994. County Not Identified is a category of information where the county name was not recorded for 140 child abuse reports during the 1994 fiscal year. **Data Source:** Special data run for 1994. Fiscal year data. Idaho Department of Health and Welfare, Division of Family and Community Services, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5700).

Total Number of Families Subject of Child Abuse Reports is the number of families that were subject of child abuse reports filed with the Idaho Department of Health and Welfare during fiscal year 1994. Family total is an unduplicated count by county and includes 109 "duplicated" families (families that were reported in more than one county). To get a statewide "unduplicated" family total, the 109 duplicated families must be subtracted from 9,946. The statewide unduplicated family count is 9,837. County Not Identified is a category of information where the county

name was not recorded for 140 child abuse reports, and 133 families subject of those reports during the 1994 fiscal year. **Data Source:** Special data run for 1994. Fiscal year data. Idaho Department of Health and Welfare, Division of Family and Community Services, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5700).

Child Abuse by Number of Reports and Type of Abuse is the number of reports filed with the Idaho Department of Health and Welfare by category of abuse — Sexual, Physical, Neglect or Other, during the 1994 fiscal year. The "Other" category includes anything left blank, status offenses, information only calls, home study, interstate compacts, property offenses, disruptive behavior, suicide, offenses against parents, other, court related, service needs assessments, self support, affective disorder, medical/social evaluations or anything that did not fall into the other three categories. County Not Identified is a category of information where the county name was not recorded for 140 child abuse reports during the 1994 fiscal year. **Data Source:** Special data run for 1994. Fiscal year data. Idaho Department of Health and Welfare, Division of Family and Community Services, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5700).

Child Abuse by Disposition of Reports is the number of child abuse reports by disposition type — Valid, Indicated, Unable to Determine, Invalid, or Other, as determined by the Idaho Department of Health and Welfare during the 1994 fiscal year. Valid refers to child abuse and neglect reports when the allegations are confirmed, worker witnessed, court determined or evaluated, involve a confession or substantiated through the presence of significant evidence which establishes a factual foundation for the determination. Indicated refers to child abuse and neglect reports when allegations are neither confirmable nor refutable however, the worker has reasonable cause to believe the abuse or neglect has occurred. Unable to Determine refers to a determination that child abuse or neglect cannot be made and the worker has no firm belief that abuse has occurred. This includes reports relating to families the worker is unable to locate. Invalid refers to child abuse and neglect reports that are clearly unfounded, erroneous, or otherwise incorrect, and the worker feels comfortable that the abuse or neglect did not occur. Other includes anything left blank, cases not dispositioned, diverted/referred, accepted, informal, evaluation only, client rejected services, commitment security, commitment community, county probation, voluntary termination, or anything that did not fall into the other four categories. County Not Identified is a category of information where the county name was not recorded for 140 child abuse reports during the 1994 fiscal year. **Data Source:** Special data run for 1994 data. Fiscal year data. Idaho Department of Health and Welfare, Division of Family and Community Services, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5700).

BACKGROUND INFORMATION

POPULATION

Total Population is the total resident population in a specific geographic area during the census year. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Population by Race and Ethnicity is the total resident population in a specific geographic area during the census year, broken into categories of race and ethnicity. The categories for race includes White, Black, Asian or Pacific Islander, American Indian, Eskimo or Aleutian; and Other race. Hispanics are included under ethnicity and may be of any race. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Under 18 Population is the total resident population of persons from birth through 17 years during the census year. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Under 18 Population by Race and Ethnicity is the total resident population of persons from birth through age 17 in a specific geographic area during the census year. The population is broken into categories of race and ethnicity. The categories for race include: White, Black, Asian or Pacific Islander, American Indian, Eskimo, or Aleutian; and Other race. Hispanics are included under ethnicity and may be of any race. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

WORK & FAMILY

Children Under 18 with Both or Only Parent in Labor Force. Children under age 18 are included in this category if they live with only one parent and that parent is in the labor force (i.e., working or looking for work) or if they live with two parents and both are in the labor force. Parenthood is determined by birth, marriage, or adoption. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Children Under Six with Both or Only Parent in Labor Force. Children under age six are included in this category if they live with only one parent and that parent is in the labor force (i.e., working or looking for work), or if they live with two parents and both are in the labor force. Parenthood is determined by birth, marriage, or adoption. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Women in Labor Force with Youngest Child Under Age Six is the number of women ages 16 and over (regardless of marital status) whose youngest child is under age six, and who are in the paid labor force. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Women in Labor Force with Youngest Child Ages 6 to 17 is the number of women ages 16 and over (regardless of marital status) whose youngest child is between ages 6 and 17 and who are in the paid labor force. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Average Income of Families with Children by Family Type is the average (mean) annual income for families with related children under age 18 living in the household. "Related children" include the family head's children by birth, marriage, or adoption as well as other persons under age 18 who are related to the family head and living in the household. The average or mean income is represented for married-couple families, female-headed families with no husband present, and male-headed families with no wife present. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Families with Children Under 18 by Family Type are families with related children under age 18 living in the household. "Related children" include the family head's children by birth, marriage, or adoption, as well as other persons under age 18 who are related to the family head and living in the household. Three categories are represented for families with children by family type. These categories are married-couple families, female-headed families with no husband present, and male-headed families with no wife present. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Children Under 18 Who Are Not Living with a Parent is the number of children who do not live in the same household with at least one of their parents. Parenthood is determined by birth, marriage, or adoption. This figure also includes children living in group quarters. There are a small number of children (those living in unrelated subfamilies) where it could not be determined from Summary Tape File 3 tables whether or not they were living with a parent. These children are counted as not living with a parent. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.

Families Receiving AFDC-Basic provides cash assistance to needy families with children meeting eligibility requirements. **Data Source:** 1993. Calendar year data. Idaho Department of Health and Welfare, Division of Welfare, Research and Statistics Section, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5685).

Families Receiving AFDC-Unemployed Parent provides cash assistance to needy families with children who are deprived due to the unemployment of the family's principal wage earner. Participants must meet eligibility requirements. **Data Source:** 1993 calendar year data. Idaho Department of Health and Welfare, Division of Welfare, Research and Statistics Section, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5685).

Families Receiving Food Stamps provides food benefits necessary for good health, nutrition to low-income households, and stabilizes seasonal and low-income labor markets. Participants must meet eligibility requirements. **Data Source:** 1993 calendar year data. Idaho Department of Health and Welfare, Division of Welfare, Research and Statistics Section, P.O. Box 83720 Boise, Idaho 83720-0036 (208-334-5685).

Children Ages 5 to 17 Who Don't Speak English at Home is the number of children between ages 5 and 17 who speak a language other than English at home as recorded in the 1990 Decennial Census. **Data Source:** U.S. Bureau of the Census, 1990 Census of Population and Housing, Summary Tape File 3.
